

The world's most advanced crimp tool

- Pressmaster Ergonomic Line

Ten good reasons to choose the Ergonomic Line:

Advanced design requires 25% less handle force than previous generation.

Long life span

High strength, through-hardened alloy steel provides long life span. Guaranteed for 50,000 cycles

Accepts all K-frame die sets

No redesign of dies needed.

Widest jaw opening

For easy access to rear die nests.

Recessed ratchet release

To prevent accidental release.

10% Longer handle but same length of tool

Less handforce required.

Precise eccentric adjustment for consistent performance.

Non-slip foot to hold tool in place when leveraging it on work surface.

Optimized handle materials and texture for greatest comfort.

Broad shaped handles Reduce hand stress.

Hand-shake position of palm and fingers for reduced wrist strain.

Option of label recess Better customisation options.
